Project title :EduGenie-Google Gemini Powered Learning Assistant

Phase 7: Project Documentation Phase

1. Project Documentation:

-The project documentation phase involves preparing complete documentation of the EduGenie application. The purpose of the documentation is to clearly explain the project's objectives, design, development process, technologies, features, testing, and final results.

-The documentation contains an introduction to EduGenie and explains the problem that the project aims to solve. It also describes how Generative AI and Google Gemini are used to provide intelligent learning assistance.

The following sections are included in the project documentation:

-Project Title

-Abstract

-Introduction

-Problem Statement

-Objectives

-Existing System

-Proposed System

-Requirement Analysis

-Technologies Used

-System Architecture

-Project Design

-Project Modules

-Development Process

-Implementation

-Testing

-Screenshots

-Sample Outputs

-Advantages

-Limitations

-Future Enhancements

-Conclusion

-References

-Screenshots of the working application, source code, terminal execution, API responses, and generated outputs can also be included as supporting evidence.

-Proper documentation makes the project easier to understand and provides a complete record of the development process.
